## Sprint 1 (dynamic web page) Single Multi-player Welcome USER TASK Login page Game rules player game page game As a player, As a As a player, player, I I want to be As a player, As a want to be I want to be able to see player, I I want to be able to see the single able to see want to be able to a welcome player the multi able to log know the **USER STORY** mode, so page so player in so that rules of the that I know that I can mode, so the game game so which that I can always play knows it's that I play play with game when my correctly me my friends modes I friends can play can't As a developer I As a player, I want to be As a developer I need the would like to able to see the grid so that website to be store the user as hosted on Azure I know which letters I have a cookie so that so that access is site knows the used possible via a player browser As a player, I want to be able to use the keyboard, so that I can enter my guessed words As a player, I want to be able to see the

different multiplayer modes so that I can have a choice As a developer I want to store the 5-

letter word dictionary on the local host

As a developer I want to know the 5letter words that are valid answers.

As a developer I need to format the whole site so that it looks nice and is enjoyable for the user to play

## End sprint 1

End sprint 1							
	Sprint 2 (Single Player)						
	Login page	Welcome page	Game rules	Single player game	Multi-player game		
	As a developer I need to store the player's details to such an extent that their streak, scores can be saved			As a player, I want the keyboard to show if letters I have chosen are in the answer word			
				As a player, I want the keyboard to show if letters I have chosen are in the correct positions in the answer word			
					l want to see words are on grid		
					etters I have n the answer		
				As a player, I if my guesso valid			
					want to know the correct ord		
End sprint 2	2						

Sprint 3 (Multiplayer games)						
Login page	Welcome page	Game rules	Single player game	Multi-player game		
As a player, I want my login details to be safely stored/ secured			As a player, I want to be able to access a log so that all actions taken can be captured and viewed			
				As a player, I want the option to decide on the word that my fellow players will guess		
				As a player, I want to see live updates of my opponent's progress in the game so that I know if they have won/lost		
				As a player, I want to see the names of my opponents		
				As a player, I want my opponent's grid to be		

progress

As a developer, I need to store the dictionary safely so that the player cannot cheat the game

colour-coded so that I know their game
